PROFESSIONAL SUMMARY

B.Tech Computer Science graduate with a strong foundation in **Data Science, Data Analytics, and Machine Learning**. Hands-on experience in Python, SQL, data analysis, and machine learning through healthcare and predictive analytics projects. Skilled in data cleaning, EDA, feature engineering, and model evaluation. Seeking an entry-level Data Analyst or Data Scientist role to apply analytical and technical skills to real-world data-driven problems.

EDUCATION

- B.Tech – Computer Science Engineering**, University College of Engineering and Technology for Women, KU Campus, Warangal 2022 – 2026
CGPA: 8.91 / 10
- Higher Secondary (MPC)**, Shivani Junior College, Hanmakonda 2020 – 2022
Percentage: 98.1%
- Secondary Education (Class X)**, New Millennium Model School, Jammikunta 2020
Percentage: 100%

TECHNICAL SKILLS

Programming: Python, SQL
Data Science: Pandas, NumPy, Data Cleaning, EDA, Statistical Analysis
Data Visualization: Excel, Power BI, Matplotlib, Seaborn, Tableau
Machine Learning: Scikit-learn, TensorFlow/Keras, Regression, Classification, Clustering, Feature Engineering, Model Evaluation
Databases: MySQL
Tools: Jupyter Notebook, Git, GitHub

PROJECTS

- Blood Group Detection Using Fingerprint Images** | [GitHub Repository](#) 2024
Python, TensorFlow/Keras, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook
 - Built and trained deep learning models (LeNet, AlexNet, VGG16, ResNet34) to classify blood groups (A, B, AB, O with Rh factor) from fingerprint images.
 - Compared model performance using accuracy/loss curves and evaluation metrics across different epoch settings to select the best model (ResNet).
 - Demonstrated a non-invasive, low-cost alternative to lab testing with potential use in emergency healthcare and remote diagnostics.
- Intelligent Drug Interaction & Allergy Risk Prediction System** | [GitHub Repository](#) 2024
Python, Flask, Scikit-learn, React.js, SQLite, REST API (RxNorm)
 - Developed a full-stack web application (Flask backend, React frontend) that detects drug-drug interactions using the RxNorm medical API.
 - Implemented severity scoring and allergy conflict checks, and a Logistic Regression model (Scikit-learn) to predict overall medication risk (safe / moderate / high).
 - Built an interactive dashboard where users enter medications and allergies to receive a consolidated risk assessment.

CERTIFICATIONS & TRAINING

- [Data Science Training – United Way of Hyderabad](#)
- [Web Development Internship – Pantech E-Learning \(2024\)](#)
- [Python Programming – GeeksforGeeks \(2023\)](#)
- [UI/UX App Redesign Using Figma – NxtWave Workshop](#)
- [Web Development Internship – Internpe](#)

ACHIEVEMENTS

- Scored 100% in Class X and 98.1% in Class XII (MPC); consistently among top performers.
- Solving LeetCode problems to strengthen problem-solving and coding skills.
